

Amendments to the Drawings

Replace the original Figures with the replacement Figures 1 to 9 enclosed herewith.

Remarks

Claims 1 to 20 are currently pending. Claim 15 has been rejected under 35 U.S.C. 102(b) as being anticipated by United States Patent No. 6,135,475 (Brown et al). The Drawings and the Specification have been objected to for a plurality of formal reasons.

The claims of the application have been amended to overcome the objections of the Examiner and to better define the invention in light of the cited prior art. In particular, claim 15 has been amended to include the features of claim 16, and claims 17, 19 and 20 have been amended to include the elements of claim 15. Accordingly all claims are in condition for allowance.

The Figures have been amended to correct the informalities detailed in the action. In particular, all of the Figures have been amended to ensure the view numbers are larger than the reference numbers, and Figure 4 has been amended to identify the brake pad 19a and the rear wheel bracket 21a. Moreover, Figures 3, 5 to 9 have been amended to correct the incorrect reference numerals and the misdirected lead lines, as listed in the action.

The phrases objected to in the Abstract have been removed, and the typographical errors have been corrected in the specification.

Applicant respectfully requests reconsideration of this application.

Should any minor informalities need to be addressed, the Examiner is encouraged to contact the undersigned attorney at the telephone number listed below.

The Commissioner is hereby authorized to charge any fees which may be required, or credit any overpayment, to Deposit Account No: 50-2810.

Please associate this application with Customer No: 24949.

Respectfully,

Doug MacLean
